Identify and Correct Track Issues

Identify the Issues with an Accelerometer Test and a Track Gauge Survey

Dynamic Attractions can perform an onsite analysis to determine the best course of action:

- Survey the track rail to check for variances in track gauge
- Use accelerometer testing to find anomalies which point to rough track
- Perform before and after accelerometer testing to show improvement

Correct the Issues with Track Rail Replacement or Adjustment

- Replace rough or fatigued track sections
- Adjust track rail that is out of gauge
- New track rail is manufactured using 3D continuous bending techniques
- Dynamic Attractions provides labor to remove old and install new track rail

Benefits of Track Replacement and Adjustment

- Improve guest ride experience
- Improve wheel wear
- Reduce impacts to your vehicles
